**Subject: Request for Property Access to Collect Samples
West County Road 112 Ground Water Plume Site
Remedial Investigation/Feasibility Study**

Dear Resident or Property Owner:

As a representative for the U.S. Environmental Protection Agency (EPA), EA Engineering, Science, and Technology, Inc. (EA) is conducting an investigation of properties located near the West County Road 112 Ground Water Plume Superfund site in Midland, Texas. This investigation involves the collection of ground water samples for the analysis of total metals, hexavalent chromium, and/or other parameters.

In order to collect samples on your property, EPA requires that you grant access to the property. Please complete and sign the attached access agreement and return it to EA via one of the following options:

1. Mail the signed access agreement to EA in the enclosed self-addressed stamped envelope.
2. Fax the access agreement to the EA Dallas office at (972) 315-5181.
3. Scan the access agreement and send it as an e-mail attachment to aballweg@eaest.com.

Sampling activities are scheduled to begin during November 2010 and may continue through December 2011.

If you have any questions regarding the access agreement, please contact me in Dallas at (972) 315-3922 (office) or (817) 707-3252 (cell).

Sincerely,

April Ballweg
EA Project Manager
